

SHREE GANESH

'23 New Year Outlook by Father-Son duo, Astro-Numerologists Sanjay B Jumaani & Aneesh S Jumaani.

A mere digit change can have an impact so strong on the duffels of our destinies that we have seen, experienced and progressed through the same distinctly over the course of the years. Time is surely flying, but the good news is, if you know your numbers— you're the pilot!

This year, we were finally reintroduced to the routines of a life before masks and lockdowns. We were finally able to hug without a budge, travel without a gravel, invest without bereft and purchase without a chase! It was certainly a year of revenue.

With that said and without further ado, let's dive right into the sea of '23! Will its tides produce a storm or will its waves maintain the calm? Here's our take.

2023 = 7, which is ruled by Neptune (Ketu), the planet of mind, intuition, innovation, illusion, imagination, body, heart, soul and all under the umbrella of nature. It is a spiritual number possessing healing and nutritional properties, and being a psychic planet, it governs the mind.

So, let's delve into multiple aspects of our lives that tend to determine the quality of our year!

Weather : Now as for the next year; a cold prediction is that cold areas can get colder, owing to the fact that Neptune is very far from the sun. Due to the repercussions of global warming, we may not see respite from heaty summers. Storms may be on the cards due to Neptune's windy and gaseous nature, and disasters from the sea like earthquakes and tsunamis may also occur. Moreover, there are chances of increased floods, rains and other water body issues. It is also likely that methane emissions may increase in 2023 due to human activities.

Industries : With regards to 2023, creative fields like arts and crafts, media, advertising, entertainment, painting, and designing of all kinds are likely to do well. Distributors of such creativity like authors, writers and filmmakers who rely on their imagination may experience a spike in their artistry and consecutively perform well. Cinema and theatre dramas may also show positive results as Neptune is acquainted with illusions, and mystery, drama, romance and horror movies are all about illusions. Theatres, plays, live arts, comedy, etc. can do well too. OTT may outpace cinemas with record-breaking subscriptions, while TV set purchases are likely to increase. Occult sciences like Astrology, Tarot, Palmistry, Vastu, Numerology, etc. are likely to do much better, as Neptune is the planet of intuition and the mind. To top it up, service providing industries such as counselling, nutrition, yoga-pranayam, medicine and healthcare industries may also make hay when the sun shines.

Gaming, game development, web development, innovation and technology, digital and social revolution will continue to bloom. Sales of electronics, especially televisions and their viewership will increase, and event management companies may also prosper. Real estate industry is also treading the road to betterment in 2023, following which properties may get more expensive in 2024. Hence, our cautious advice to those who are stable is to purchase this year. Due to the development of infrastructure, steel and cement will also do well.

Demand for normal as well as high-end vehicles will remain intact in the coming year, and aviation, travel and tourism will maintain the momentum of 2022 in 2023 as well. Religious travel, import-export, shipping and transportation will also benefit in the bargain.

The flip side of Neptune is that it causes moodiness and anxiety, hence the consumption of unhealthy foods such as sweets and snacks or overuse of alcohol and drugs is also probable, though we hope we are wrong about the same.

Farming and agricultural fields can yield this year, and we may be able to see a growth in the number of vegan and vegetarian people as well as restaurants. With that said, fresh-to-home

delivery models like Big Basket can also do well. Alternate energy, solar energy, green resources, renewable energy like Hydrogen-powered resources may also make the headlines, because 80% of Neptune is comprised of Hydrogen, hence a lot of water. Due to the same, water-related fields like mineral water companies, liquor industry, soda companies like Pepsi and Coke as well as chemical and dye manufacturing companies may shine.

Philanthropy, charity work, animal-care groups and NGO's may also increase since #7 is not a materialistic number.

Oil :When nobody had even imagined or thought of oil, we predicted about it for the first time and within months, experienced the outcome of the same. Oil went on to break its own records in 2022. Because travel, tourism and manufacturing industries require large amount of oil, its demand will continue to exist yet fluctuate minutely and gradually. Though, the growth will likely not be as much as the previous year.

General :Due to increasing depression and anxiety as an outcome of Neptune's Psychic nature, Psychologists' and Psychiatrists' couches may be full. Owing to its magic-related inclination, this year may also see a rise in mind readers, empathes and unfortunately even scammers or con-artists.

Metals:For 2023, Gold will see highs and lows as Neptune is a gray planet. So, whenever you see a big dip, you may hold some gold. Silver can sizzle, even if not too much. It will wake up from its slumber and may perform better than 2022.

Where to invest :Real estate will continue its momentum, so you can invest in property or land. Because of probable recession, Sensex will see ups & downs and would be very volatile.

India and Economy :We stand by our stance that 2022 onwards India will be declared as a 'Sone ki Chiddiya', and this phase is the first step of the climb to the superpower status! This year too, our economy is likely to do well. Though the momentum of 2022 will be carried forward, 2023 will be slow, but steady and resilient. In fact, for the next 10 years we will be listed on the most progressive and strongest countries.

2025 totals to 9, and India will then be in her 78th (6) year of Independence, hence deeming it another landmark year.

World:-Tesla, Amazon, Apple and Samsung all add to 7, so this year may be advantageous to these companies. We rightfully predicted the same for them back in 2014 as well.

Recession is a mind game that can play on our minds this year, being inevitable in multiple countries. The successor of 2023 is 2024 (8, Saturn), thus making it a little longer before we burst the bubble of recession.

People to do well :As said always, those born on any Number can usually excel if their current age is the same as their principal Number. For instance, number 6 Gautam Adani became India's richest in his 60th year that too in 2022.

Other than that, if you are a no. 1, 2, 4 or 7, i.e., if your birthday is on the 1st, 2nd, 4th, 7th, 10th, 11th, 13th, 16th, 19th, 20th, 22nd, 25th, 28th & 29th of any month, or if you are a Leo or Cancerian, this may be a remarkable year for you.

Health, Colours and Gems : This year, it is imperative for you to take extra care of your mental health and stay safe from illnesses like depression, anxiety, moodiness, etc., that may hinder the peace of your mind. Those already experiencing blood pressure and diabetes related issues may have to be more cautious this year. Try looking out for anaemia and stomach related problems as well. Final tip – don't be restless, so try to rest less.

The lucky colours of the year shall be Gray, Green, Blue, Cream and White.

In 2023, the Gem of the year goes to 'Cat's Eye', i.e. Lasuniya. Those experiencing mental health troubles may benefit from this stone. Yet, this gem may not be applicable to anyone and everyone, so do not wear or use it without an expert's recommendation.

Write '23

One of the most important tips this year would be to always refer to as well as write the year as '23 and not as '2023'. This is because 23 is a very fortunate octave of the number 5. Baahubali, a biproduct of Numerology was brought to 23.

On the flip side, from a prosperity and materialistic gain point of view, 7 is not a very good number. Moreover, it is known for its overemotional nature, hence we must listen to our brains more than our heart.

Attached is a report card of our 2022 predictions that we pompously produce as early 95% of the prophecies have been on the dot!

(In Pic)

Wishing all readers a very happy new year.

Predictions for Numbers 1-9

Number 1: People born on the 1st, 10th, 19th and 28th in any month are termed as Number 1.

Rule #1) Always be number 1!

Rule #2) Don't forget #1.

2023 totals to 7, which can be beneficial and significant to number 1 since 1, 2, 4, and 7 are a family of numbers.

'Top-of-the-charts' is where you belong, and you will continue to bloom where you are planted this year. In simple words, try to use this period to your greatest advantage.

The bold and forceful attitude you possess to overcome hurdles may be the key behind the lock of your success this year. But for that, persistence & consistency are key. Neptune's wavy moods may distract you, so try not to get persuaded by the same.

Those in creative or service industries may be able to shine brighter this year. Don't overanalyse matters by delving into depths, so avoid being critical and clinical.

If tying the knot or adding to the lot (both - kids or property!) are mapped in your plans, this year may be crucial to execute them. But in case you're looking for a specific special period, you can find your lucky months on our recent Instagram posts.

On the personal front, you may find yourself more dreamy and romantic than usual, which is a very good thing as you will be able to provide quality time to your loved ones.

Try to strike a balance between your thoughts and the way others think, and not derail or disregard their point of view. You're not perfect, neither are you the last of the stars; even if you like to believe so. With regards to health, do not overwork yourself and guard against nervous breakdowns or anger.

Number 2: #2 represents the Moon, and they are persons born on the 2nd, 11th, 20th and 29th of any month. "In a gentle way, you can shake the world" - said Mahatma Gandhi. Who better than a fellow number 2 to say that! Well, Sanjay B Jumaani says, now's the time to literally take the world by storm.

Number 2, Mood and Number 7, Neptune are extremely identical, so this year can be considered as your year too. There are great chances of progress in work-related fields, especially media, creative and service industries. This year will be a platform to sky-rocket!

You may find it easier to divert from difficulties and also increase your finances, through which you will be able to pave the way to achieve existing plans. Those looking to invest in property can do so. It's a good time for other important life decisions too.

However, you look more likely than usual to become moody and lazy this year. Depending on the efforts and actions of others will not do you good, so try to become self-reliant and complete your tasks yourself. Doing so will also help you reach the depths of your own hidden talents and hobbies. Those who seek to take inspiration from others, this year you are likely to find that inspira-

tion from within yourself. While awards are definitely important, in my opinion rewards are more important in this generation!

In the year of Neptune, it is possible that you may become oversensitive and emotional, so try not indulging in others' talks and actions too much. Another's words should not become the reason for your sadness. You may be able to handle this emotional instability by being around your family and close friends.

In matters of health, your mind is usually the key to good health. Alternate therapies, reading, listening to music, or even creating your own lines or tunes is very much possible, since your ruler, the Moon, is a master of arts.

And lastly, a golden tip this year and every year is to keep a check on Diabetes and blood pressure. Especially if you are not young, this should be done periodically, pandemic or no pandemic!

Number 3: People born on the 3rd, 12th, 21st and 30th in any month are termed as Number 3. In comparison to last year, materialistically, this may be an average year, but there is nothing to worry about. Neither white nor black, it could be grey, just like Neptune. You could however compensate for this by not over-spending on unnecessary things. Use your accumulated hard-earned reserves wisely.

You are a good wealth manager by default, so the toughest of times can be dealt with by nobody like you. You are capable of turning from zero to hero, hence you may be able to escape any hurdle. Having said that, you may have to work harder now to taste the sweet nectar of your labour in the coming few years.

Nevertheless, it is a good year for spiritual pursuits, you can try your hand at diet, fitness, meditation or Yoga. But for most No. 3's, work itself is everything.

But barring work aside, life is filled with mixed opportunities that can contribute to happiness. Try diverting more time towards your loved ones to relieve yourself from stress and burdens. These feelings may be temporary, but their consequences are long-lasting, so take care of your health. Treat your juniors with a little more warmth and give them the benefit of doubt in order to maintain good relations with them. Keep a hand's distance from a handful of people who may not be entirely happy about your successes, they may even try to take advantage of your goodness.

With regards to health, take particular care of your lungs, throat and chest.

Number 4: People born on the 4th, 13th, 22nd, and 31st in any month are termed as # 4's.

The good news is that No. 7 is good for No 4's, so if you play your cards well, you can expect a field year. Those working in creative, electronic, electric, technical and IT industries may outperform others this year.

You always present your thoughts and understanding no matter the situation because you believe in a straight-forward approach, but make sure the advice is not unsolicited. We like to think that everyone is as strong a knowledge acquirer as us, but that may not always be the case. Blame it on distractions that can arise from mere overuse of cell phones or other gadgets, hence leading to shorter attention spans.

You believe in surviving and thriving because of your virtues of adapting to the times. You don't want to become obsolete like dinosaurs, black berries and Nokias!

Don't let people take advantage of your willingness to do everything by yourself. Learn to delegate work to subordinates. Superstars and team captains are also incomplete without their team and family support systems!

Your unique ideas and solutions may make you the centre of attraction thus helping you achieve successes in your field, provided you remember one thing. Neptune has the tendency to make you dreamy and inconsistent, so try focus on staying focused.

In terms of romance, you may earn more points this year than last year. Well, that's good news for your partner as well as people you all are surrounded with. This is an indication that despite all your hustle, you may be able to spare quality time for your loved ones too.

2023 can be a good year for those who are already in search for jobs, looking to marry or expand, or preparing to take a big decision.

Your mind is definitely fickle, so don't let your thoughts jump around. Avoid over-thinking and over-analysing this Psychic Neptune-ruled year.

Compared to last year, this year you may be able to collect larger savings and avoid spending on less important spheres. With this approach, you can even say goodbye to many hand-to-mouth years.

Number 5: People born on the 5th, 14th, 23rd in any month are termed as # 5's, .

The last two years may have been good for you, and why not? You're a go-getter. But, this year your pace may be a little slower, though that won't stop you. In fact, you may get a little break from your speed and can focus on rehabilitation and your personal well-being.

Professionally, you may face ups and downs. Nevertheless, money will grow in time and your hard-work will pay off colourfully. Remember, the fruits of patience are sweet. Work and leisure related travel are in the vision this year, so fly like a high five!

Socially, you may be more involved than others and may also meet many new people. In my opinion, this year you must pay more attention to personal relationships.

On the health front, take care of your stomach, because excessive anxiety and stress can give you stomach or mind problems. Don't make your own mind your enemy.

Alternative therapies like yoga and pranayama will be your companions in the journey of 2023 as well as that of life.

Number 6: People born on the 6th, 15th and 24th in any month are termed as #6 .

2023 will be a rejuvenating year compared to the hangover of 2022. Your body and mind need a break after over-the-top partying, so don't be worried if the coming year is relatively slower, but steadier and sturdier. However, the efforts (if) made in 2022 can translate well.

The momentum shall continue and sustain, because even when fast trains apply brakes, their locomotion does not completely stop.

Connecting and interacting with people that you care for and building long lasting relationships will probably be the highpoint this year. The cooperation from colleagues and family members is what will give you the complete look and feel of a finished product.

This year you may be successful in fulfilling your wishes. Don't be upset about obstacles in the search of a partner, marriages are made in heaven should be your consolation!

Those in creative and luxurious fields will progress with more creativity, but due to the richness and bigness of your plans, implementation may be difficult.

Keep your patience levels in the top gear, Rome, Burj Khalifa and even the Qatar FIFA Stadium were not built in a day!

Financially, this may be an average year. That doesn't mean that your earnings will be less, but that savings may be less. So spend wisely and remember that a light purse is a heavy curse. It is possible that 2024 onwards your finances may improve.

You may be more available socially, but don't let people take you for granted. Try keeping away from feelings like insecurity and anxiety, as you are already predisposed to an emotional persona. Think from your brains instead of your heart.

Keep a tab on your lifestyle; be it diet, gaming, gadget overuse or loose ways of living; this can help avoid many illnesses. And stay away from any such addictions, if any. Your mantra as usual is to avoid overeating and binging.

Number 7: People born on the 7th, 16th and 25th in any month are termed as # 7's .

In contrast to the previous few years, 2023 is likely to be your ride to eventfulness and significance, since 7 is your primary number. So try taking advantage of every opportunity!

Depend on your intuition and gut, you are most prominent for it. You may have realised that your intuitions have helped you from sticky situations in the past.

Implement your artistic skills in your work as well as personal life, but do maintain realism in the same. To avoid restlessness set in, and to be more consistent in carrying out your job is what you must focus on this year and every year!

Neptune, your ruler, governs the mind. So better Mind it! I mean, Bind it like Beckham!

It can be a dreamy and emotional number, so this year it is imperative for you to pay attention to your feelings. Personal or problematic relationships may see accelerate into improvement too. Those in search for marriage, it is possible that this year the search may end. It's an auspicious time for a baby, house change or a job/career change too.

Your energy and hard-work will pay off manifold this year. You will be able to achieve a harmonious balance between your emotional and logical state of mind.

Avoid meaningless arguments which are possible because of those who don't understand your way of functioning. Such people or even critics are not always our enemies.

Projects that have been in the pipeline earlier will probably flow in your favour which could also translate into monetary gains.

Spiritually, a satisfying year, and sports, music, reading, writing, studying occult sciences, yoga, meditation and alternate therapies could give you immense gratification.

Those in import-export, banking, creative fields, consultancy, or any kind of service related work could get noticed and make headlines too in your space at least. Travel is indicated too.

Number 8: People born on the 8th, 17th, and 26th in any month are termed as # 8's .

Events in your life make you feel that struggle is in an important part of your existence, but then you should remember that running in hurdles make your legs stronger, and help you brace problems with dignity. Stride with strength and follow your passions, match the wavelength of your rewards and your actions. Try not to get annoyed by silly mistakes that people might commit. You will feel enthusiastic due to your positive frame of mind that will enable you to settle many incomplete tasks. For many of you, on the basis of a decent 2013, you can feel the sweetness linger for a larger part of 2014. But once done, begin the 'sowing' process again, laboriously. Not a time for short-cuts. Health-wise, be wise! Study your diet to see what suits you. It is possible that this year your mood swings will make you a victim of binge eating. Depression and anxiety are on the cards, so try to execute from your mind and not your heart. Burst your bubble of isolation and try to socialise more.

Number 9: People born on the 9th, 18th and 27th in any month are termed # 9's .

You have to be careful in your investments this year. Avoid fast-money schemes and embrace long-term investments. Use your energy proactively in activities such as gym, sports, yoga or meditation. A golden advice for you this year would be to avoid quarrels, litigations and lawsuits, as these would do more harm. Relationships should be dealt with utmost caution; avoid flare-ups. Try to be tolerant with slow people, especially in personal matters.

Avoid being too impulsive in taking decisions as sometimes over-excitement can complicate matters. The approach should be 'long' term' in whatever you endeavour. The good news is, time-flies!

GOD BLESS

WITH REGARDS

SANJAY B JUMAANI & Aneesh S Jumaani.
